Batch Control Systems

Design, Application, and Implementation, 2nd Edition

William M. Hawkins and Thomas G. Fisher

ISA™

Table of Contents

Chapter 1 - Introduction to Manufacturing Processes 1
Manufacturing 1
Process 2
Other Process Topics 3
Process Classification 3
Blasting Cap Plant 4
Characterizing the Processes in a Blasting Cap Plant 7
Other Process Examples 8
Process Properties 9
Properties for Process Classification 11
Batch Process Definition 12
Batch Process 14
Standard Definition 14
Semi-Batch Process 15
Auxiliary Processes 16
Process Boundaries 17
Summary 18

Chapter 2 - Introduction to Process Design and Construction 19
Initial Steps 19
Process Flow Diagram 22
Analysis 24
Piping and Instrumentation Diagram 24
Loop Sheets 26
Example of Process Design and Construction 28
Process Flow Diagram 29
Batch Design 30
Construction 32
Modular Design 33
Pressure Control Example 34
Function Blocks 35
Summary 36

Chapter 3 - Introduction to Process Control 39
Types of Control 40
Regulatory 40
Control Terms 42
PID Controller 44
Control Modes 45
Discrete Control 46
Device Controller 48

Sequential Control 49
Constraint Control 51
Alarms 52
Overrides 54
Interlocks 55
Interlock Variations 56
Process Interlocks 56
Safety Interlocks 57
Summary 58

Chapter 4 - Controlled Equipment 59
Introduction to Controlled Equipment 59
The Role of Humans in Process Control 50
Process Equipment 62
Controlled Process Equipment 63
Examples of Controlled Equipment 64
Common Equipment 75
Summary 76

Chapter 5 - Recipes 77
Definitions 77
NAMUR 79
Recipes 83
Evolution of Recipes 83
Summary 87

Chapter 6 - 88 Physical Models 89
Batch Processes and Equipment in 88.01 91
Other Physical Models 101
Control in the Physical Model 104
Summary 107

Chapter 7 - 88 Batch Control Concepts, Part 1 109
Summary 123

Chapter 8 - 88 Batch Control Concepts, Part 2
Summary 140

Chapter 9 - 88 Batch Control Concepts, Part 3 141
Summary 156

Chapter 10 - 88 Perspective and Review
Introduction 157

Before SP88 157
During SP88 165
Summary 167

Chapter 11 - 88 Control Activities and Functions, Part 1 169
Summary 186

Chapter 12 - 88 Control Activities and Functions, Part 2 187
Summary 201

Chapter 13 - 88 Definitions 203
Summary 215

Chapter 14 - Further 88 Clarifications 217
Definitions 217
Physical Model 218
Batch Control Concepts 224
Batch Control Activities 241
Procedure Function Charts 246
A Word about Control Systems 247
Summary 250

Chapter 15 - Generic 88 Implementation 253
Introduction 253
Designing Batch Process Control 254
Review Understanding 284
Summary 291

Chapter 16 - Role of 95 and Other Things 293
Joining 95 and 88 294
The Role of STEP 301
Expanding the Scope of 88 302
Fieldbus 309
Summary 313

Figures and Tables

Chapter 1
Figure 1-1 Cross-Section of a Blasting Cap 4
Figure 1-2 Approximate Layout of Explosives Plant 6
Figure 1-3 Sample Specialty Baking Plant 17

Table 1-1 Process Properties 9
Table 1-2 Three Unambiguous Properties 11
Table 1-3 Batch vs. Continuous Processes 12

Chapter 2
Figure 2-1 Example of a PFD (TPA Process) 23
Figure 2-2 Rough Example of a P&ID 25
Figure 2-3 Example of a Loop Sheet 27
Figure 2-4 Example of a Block Diagram 35

Table 2-1 Material Balance for One Reactor 29
Table 2-2 Gantt Chart for Four Reactors/2-Hour Cycle 29
Table 2-3 Overall Material Balance 29

Chapter 3
Figure 3-1 Pressure vs. Flow Curves 41
Figure 3-2 The Elements of Regulatory Control Loop 41
Figure 3-3 Discrete Control Loop 47
Figure 3-4 Simple SFC 50
Figure 3-5 Integral-Only Control 55

Chapter 4
Figure 4-1 A Combination of Process Equipment and Control 64
Figure 4-2a Instrumented Reactor 65
Figure 4-2b Bioreactor 67
Figure 4-2c Mobile Reactor 68
Figure 4-3 Shell and Tube Heat Exchanger 71
Figure 4-4 Heat Exchanger for Heating and Cooling 72
Figure 4-5 Heat Exchangers for Jacket Batch Reactor 72

Chapter 5
Table 5-1 Condensation of NE 33-Figure 7.1

Chapter 6
Figure 6-1 Process Model (Entity-Relationship Diagram) 92
Figure 6-2 Physical Model 94
Figure 6-3 ISA CIM Model Compared to 99-01 Model 97
Figure 6-4 Comparison of Physical Structures 99
Figure 6-5 Uppermost Levels of Communication 106
Figure 6-6 Process Control Levels of Communication 106

Chapter 7
Figure 7-1 Three-Level Hierarchy of Control 109
Figure 7-2 Procedural Control Model 111
Figure 7-3 Procedural control/equipment mapping to achieve functionality 116

Chapter 8
Figure 8-1 Recipe Types 126
Figure 8-2 Relationship of General or Site Recipe and Master Recipe 133
Figure 8-3 Linking of Control Recipe and Equipment Entity 137
Figure 8-4 Unit Procedure Built into Equipment Entity 138

Chapter 9
Figure 9-1a The Most Basic Control an SFC 151
Figure 9-1b Transfer Heater 151
Figure 9-2 Sequence for Two Directions 152
Figure 9-3 State Transition Diagram 154

Chapter 10
Table 10-1 Hierarchy for Recipes 160
Table 10-2 Generic Functions of a CIM System 162

Chapter 11
Figure 11-1 Control Activity Model 171
Figure 11-2 Simultaneous Definition/Selection 175
Figure 11-3 Recipe Management

Chapter 12
Figure 12-1 Process Management 188
Figure 12-2 Unit Supervision 194
Figure 12-3 Process Control 199

Chapter 13 - None

Chapter 14
Figure 14-1 Complete Physical Model 219
Figure 14-2 Equipment Entities and the Purdue Reference Model (PRM) 225
Figure 14-3 The Common Valve Problem–Two Units 240
Figure 14-4 The Common Valve Problem–More Than Two Units 241

Chapter 15
Figure 15-1 Procedure for Designing a Batch Process Control System 256
Figure 15-2 Procedure in Three Stages and Three Operations 258
Figure 15-3 Process Stage in Three Operations and Three Actions 258
Figure 15-4 Pattern Drawing 262
Figure 15-5 Example of Three Modules 265
Figure 15-6 Exception Handling for Reactor Temperature Control 275
Figure 15-7 Control Modules required for Interfacing with Phase Logic 277
Figure 15-8 Control Block Configuration for Reactor Temperature Control 279

Table 15-1 Table for CIM PID Pattern Drawing 263
Table 15-2 Description of PID Pattern 263
Table 15-3 Table for Specific Module 264
Table 15-4 Table of Common Parameter Names 264
Table 15-5 Generic 88 Implementation for Heat Transfer 281
Table 15-6 Generic 88 Implementation for Heat Transfer Shut Down 282
Table 15-7 Generic 88 Implementation for Heat Transfer-Modified 286
Table 15-8 Generic 88 Implementation for Heat Transfer Shut Down-Modified

Chapter 16
Figure 16-1 Activity Model of Production Operations Management 295
Figure 16-2 Control Activity Model 295
Figure 16-3 Comparison of Ideas from 88 and 95 296
Figure 16-4 Possible Interface of 88 and 95 300
