CONTENTS

INTRODUCTION 11
1 Scope 13
2 Normative references 13
3 Terms, definitions and abbreviations 14
3.1 Terms and definitions 14
3.2 Abbreviations 15
4 Production operations models and generic operations models 15
4.1 Information models 15
4.2 General modeling information 17
4.3 Extensibility of attributes through properties 17
4.4 Object model structure 18
4.5 Explanation of tables 18
4.6 Relationship of models 21
4.7 Hierarchy scope 22
4.8 Value types 23
5 Common object models 27
5.1 Personnel information 27
5.2 Role based equipment information 33
5.3 Physical asset information 40
5.4 Material information 46
5.5 Process segment information 58
6 Operations management information 69
6.1 Operations definition information 69
6.2 Operations schedule information 84
6.3 Operations performance information 100
6.4 Operations capability information 116
6.5 Process segment capability information 128
7 Object model inter-relationships 130
8 List of objects 134
9 Compliance 138
Annex A (Normative) Production specific information 139
Annex B (Informative) Use and examples 147
Annex C (Informative) Example data sets 157
Annex D (Informative) Questions and answers about object use 165
Annex E (Informative) Logical information flows 181
Bibliography 184
