CONTENTS

1 Scope 13
2 ~~Normative~~ References 15
3 Terms and definitions 15
4 Grouping and classification of intrinsically safe apparatus and associated apparatus 15
5 ~~Categories~~ Levels of protection of electrical apparatus 16
6 Apparatus construction 16
6.1 Enclosures 16
6.2 Temperatures of apparatus ~~immersed in dust~~ 16
6.2.1 General 16
6.2.2 Supplementary requirements for apparatus immersed in dust 16
6.2.3 Standardized dust immersion temperature test 17
~~6.2.4~~ ~~Wiring within apparatus~~ 18
~~6.2.5~~ ~~Printed circuit wiring~~ 18
6.2.6 Unenclosed circuits 18
6.3 Facilities for connection of external circuits 18
6.3.1 Terminals 18
6.3.2 Plugs and sockets 18
6.3.3 Determination of maximum external inductance to resistance ratio (Lo/Ro) for resistance limited power source 18
6.3.4 Permanently connected cables 18
6.4 Separation distances 18
6.5 Protection against polarity reversal 18
6.6 Earth conductors, connections and terminals 18
6.7 Encapsulation used for exclusion of explosive dust ~~potentially explosive~~ atmosphere 18
7 Components on which intrinsic safety depends 19
7.1 Rating of components 19
7.2 Connectors for internal connections, plug-in cards and components 19
7.3 Fuses 19
7.4 Primary and secondary cells and batteries 19
7.5 Semiconductors 19
7.6 Failure of components and connections 19
7.7 Piezo-electric devices 19
8 Infallible components, infallible assemblies of components and infallible connections 19
9 Diode safety barriers 19
10 Type verifications, assessments and type tests 19
10.1 Spark ignition assessment 19
10.2 Temperature tests 20
10.3 Voltage tests 20
~~10.4~~ ~~Small component ignition test~~ 20
10.5 Determination of parameters of loosely specified components 20

10.6 Tests for cells and batteries 20
10.7 Mechanical test 20
10.7.1 Casting compound 20
10.7.2 Partitions 20
10.8 Tests for apparatus containing piezoelectric devices 20
10.9 Type tests for diode safety barriers and safety shunts 21
10.10 Cable pull test 21
11 Routine verifications and tests 21
12 Marking 21
12.1 General 21
12.2 Marking of connection facilities 21
12.3 Control drawings 22
13 Documentation 22
Annex A (normative) Spark test apparatus for intrinsically safe circuits 25
Annex B (informative) Measurement of creepage distances, clearances and separation ..... distances through casting compound and through solid insulation 25
Annex C (normative) Encapsulation 25
Annex D (informative) US national deviations 25

Table A — Exclusion of specific clauses of ANSI/ISA-61241-0 (12.10.02)-2006 13
~~Table 1 – Permitted dissipation within a component~~ 17
