Instrument Engineers' Handbook, Fourth Edition, Volume One: Process Measurement and Analysis

<u>Bela G. Liptak</u>, *Liptak Associates*, *Stamford*, *Connecticut*, *USA*

ISBN: 9780849310836 Number of Pages: 1,920

Table of Contents

Binary Logic Diagrams

GENERAL CONSIDERATIONS
Flowsheet Symbols and P&I Diagrams
Functional Diagrams and Function Symbols
Instrument Terminology and Performance
System Accuracy
Uncertainty Calculations
Configuring Intelligent Devices
Instrument Installation
Instrument Calibration
Response Time and Drift Testing
Redundant and Voting Systems
Instrument Evaluation

FLOW MEASUREMENT
Application and Selection
Anemometers
BTU Flowmeters for Heat Exchangers
BTU Flowmeters for Gaseous Fuels
Cross-Correlation Flow Metering
Elbow Taps
Flow Switches
Jet Deflection Flow Detectors
Laminar Flowmeters
Magnetic Flowmeters
Mass Flowmeters, Coriolis

Mass Flowmeters-Miscellaneous

Mass Flowmeters-Thermal Metering Pumps

Orifices

Pitot Tubes and Area Averaging Units
Polyphase (Oil/Water/Gas) Flowmeters
Positive-Displacement Gas Flowmeters
Positive-Displacement Liquid Meters and Provers
Purge Flow Regulators
Segmental Wedge Flowmeter
Sight Flow Indicators
Solids Flowmeters and Feeders
Target Meters

Turbine and Other Rotary Element Flowmeters

Ultrasonic Flowmeters

Variable-Area, Gap, and Vane Flowmeters

V-Cone Flowmeter

Venturi Tubes, Flow Tubes, and Flow Nozzles

Vortex and Fluidic Flowmeters

Weirs and Flumes

LEVEL MEASUREMENT

Application and Selection

Bubblers

Capacitance and Radio Frequency (RF) Admittance Probes

Conductivity and Field Effect Level Switches

Diaphragm Level Detectors

Differential Pressure Level Detectors

Displacer Level Detectors

Float Level Devices

Laser Level Sensors

Level Gauges, Including Magnetic

Microwave Level Switches

Optical Level Devices

Radar, Noncontacting Level Sensors

Radar, Contact Level Sensors (TDR, GWR, PDS)

Radiation Level Sensors

Resistance Tapes

Rotating Paddle Switches

Tank Gauges Including Float-Type Tape Gauges

Thermal Level Sensors

Time Domain Reflectometry and Phase Difference Sensors

Ultrasonic Level Detectors

Vibrating Level Switches

TEMPERATURE MEASUREMENT

Application and Selection

Bimetallic Thermometers

Calibrators and Simulators

Color Indicators, Crayons, Pellets

Fiber-Optic Thermometers

Filled-Bulb and Glass-Stem Thermometers

Integrated Circuitry (IC) Transistors and Diodes

Miscellaneous Temperature Sensors

Pneumatic and Suction Pyrometers

Pyrometric Cones

Radiation and Infrared Pyrometers

Quartz Crystal Thermometry

Resistance Temperature Detectors (RTDs)

Temperature Switches and Thermostats

Thermistors

Thermocouples

Thermowells

Ultrasonic Thermometers

PRESSURE MEASUREMENT

Selection and Application

Accessories: Seals, Snubbers, Calibrators, and Manifolds

Bellows-Type Pressure Sensors

Bourdon and Helical Pressure Sensors

Diaphragm or Capsule-Type Sensors

Differential Pressure Instruments

Electronic Pressure Sensors

High-Pressure Sensors

Manometers Multiple Pressure Scanners

Multiple Pressure Scanners

Pressure Gauges

Pressure Repeaters

Pressure and Differential Pressure Switches

Vacuum Sensors

DENSITY MEASUREMENT

Density: Applications and Selection

Displacement- and Float-Type Densitometers

Hydrometers

Hydrostatic Densitometers

Oscillating Coriolis Densitometer (Gas, Liquid, and Slurry Services)

Radiation Densitometers

Ultrasonic Sludge and Slurry Densitometers

Liquid/Slurry/Gas Density-Vibrating Densitometers

Weight-Based and Miscellaneous Densitometers

Gas Densitometers

SAFETY AND MISCELLANEOUS SENSORS

Boroscopes

Electrical and Intrinsic Safety

Electrical Meters and Sensors

Energy Management Devices (Peak Load Shedding)

Excess Flow and Regular Check Valves

Explosion Suppression and Deluge Systems

Flame Arresters, Conservation Vents, and Emergency Vents

Flame, Fire, and Smoke Detectors

Leak Detectors

Linear and Angular Position Detection

Machine Vision Technology

Metal Detectors

Noise Sensors

Proximity Sensors and Limit Switches

Relief Valves-Determination of Required Capacity

Relief Valves-Sizing, Specification, and Installation

Rupture Discs

Soft Sensors

Tachometers and Angular Speed Detectors

Thickness and Dimension Measurement

Torque and Force Transducers

Vibration, Shock, and Acceleration

Weather Stations

Weighing Systems: General Considerations

Weight Sensors

ANALYTICAL INSTRUMENTATION

Analyzer Application and Selection Analyzer Sampling: Process Samples Analyzer Sampling: Stack Particulates

Analyzers Operating on Electrochemical Principles

Air Quality Monitoring

Biometers

Biochemical Oxygen Demand, Chemical Oxygen Demand, and Total Oxygen Demand

Calorimeters
Carbon Dioxide
Carbon Monoxide

Chlorine

Chromatographs: Gas Chromatographs: Liquid

Coal Analyzers Colorimeters Combustibles

Conductivity Analyzers Consistency Analyzers Corrosion Monitoring

Differential Vapor Pressure Sensor

Dioxin Analysis Elemental Monitors Fiber-Optic Probes Fluoride Analyzers

Hydrocarbon Analyzers

Hydrogen Sulfide

Infrared Analyzers

Ion-Selective Electrodes

Mass Spectrometers

Mercury in Air Mercury in Water

Moisture in Air: Humidity and Dew Point

Moisture in Gases and Liquids

Moisture in Solids Molecular Weight

Nitrate, Ammonia, and Total Nitrogen

Nitrogen Oxide Analyzers

Odor Detection
Oil in or on Water

Open Path Spectrometry

Oxidation-Reduction Potential (ORP)

Oxygen in Gases

Oxygen in Liquids (Dissolved Oxygen)

Ozone in Gas
Ozone in Water

Particulates, Opacity, Dust, and Smoke Particle Size and Distribution Monitors

pH Measurement

Phosphorus Analyzer

Physical Properties Analyzers - ASTM Methods

Raman Analyzers

Refractometers

Rheometers

Streaming Current or Particle Charge Analyzer

Sulfur-in-Oil Analyzers
Sulfur Oxide Analyzers
Thermal Conductivity Detectors
Total Carbon Analyzers
Toxic Gas Monitoring
Turbidity, Sludge, and Suspended Solids
Ultraviolet and Visible Analyzers
Viscometers-Application and Selection
Viscometers-Laboratory
Viscometers-Industrial
Water Quality Monitoring
Wet Chemistry and Autotitrator Analyzers

APPENDIX

International System of Units
Engineering Conversion Factors
Chemical Resistance of Materials
Composition of Metallic and Other Materials
Steam and Water Tables
Friction Loss in Pipes
Tank Volumes
Directory of "Lost" Companies

INDEX
