## ABOUT THE AUTHOR

H. M. Hashemian "Hash" graduated with a B.S. degree in physics from the National University of Iran and then came to the USA in 1974. He received his M.S. degree in nuclear engineering from the University of Tennessee in 1977. He continued his studies toward a Ph.D. degree in nuclear engineering but left in 1980 to attend full time to his company, Analysis and Measurement Services Corporation (AMS). He started AMS in 1977 to commercialize the product of the research and development work in the process instrumentation area that he had done for his master's degree. His company has grown over the years and has a worldwide list of clients including major utilities in the USA and other countries. AMS specializes in I&C testing in process and power industries, development of automated test equipment, and technical training.

Mr. Hashemian is the President of AMS, an ISA fellow, and a current or past member of a number of professional societies in the U.S. and Europe. He has authored or co-authored over 100 publications including book chapters, journal articles, peer reviewed conference papers, and governmental reports. He has also worked closely with the International Electrotechnical Commission (IEC) and International Atomic Energy Agency (IAEA) to establish I&C standards and safety guidelines for electric power generation industries. He lectures regularly around the world and has taught I&C courses in 15 countries.

Mr. Hashemian is married and has two children.
