

CONTENTS

1	Scope	17
2	<u>Normative References</u>	17
3	Terms and Definitions	20
4	Constructional requirements for all electrical apparatus	22
4.1	General	22
4.2	Electrical connections	22
4.3	Clearances	25
4.4	Creepage distances	31
4.5	Solid electrical insulating materials	32
4.6	Windings	32
4.7	Temperature limitations	33
4.8	Wiring internal to apparatus	35
4.9	Degrees of protection provided by enclosures	35
4.10	<u>Fasteners</u>	35
5	Supplementary requirements for specific electrical apparatus	36
5.1	General	36
5.2	Rotating electrical machines	36
5.3	Luminaires	41
5.4	Cap lights and handlights	45
5.5	Measuring instruments and instrument transformers	46
5.6	Transformers other than instrument transformers	46
5.7	Batteries	47
5.8	General purpose connection and junction boxes	52
5.9	Resistance heaters (other than trace heaters)	52
5.10	Other electrical apparatus	54
6	Type verifications and type tests	54
6.1	Dielectric strength	54
6.2	Rotating electrical machines	55
6.3	Luminaires designed for mains supply	56
6.4	Measuring instruments and instrument transformers	59
6.5	Transformers other than instrument transformers	59
6.6	Secondary batteries	59
6.7	General purpose connection and junction boxes	62
6.8	Resistance heating devices and resistance heating units	62
6.9	Terminal insulating material tests	63
6.10	<u>Terminal dielectric tests</u>	63
7	Routine verifications and routine tests	65
7.1	Dielectric tests	65
7.2	Dielectric tests for batteries	65
7.3	Inter-turn overvoltage tests	65
8	Ex component certificates	65
8.1	General	65
8.2	Terminals	65
9	Marking and instructions	66
9.1	General marking	66
9.2	Instructions for use	66

9.3 Warning markings	68
Annex A (normative) Cage motors – Methods of test and of calculation	69
Annex B (normative) Type tests for specific forms of resistance heating devices or resistance heating units (other than trace heater).....	71
Annex C (informative) Cage motors – Thermal protection in service	73
Annex D (informative) Resistance heating devices and units – Additional electrical protection	75
Annex E (informative) Combinations of terminals and conductors for general purpose connection and junction boxes	77
Annex F (informative) Dimensions of copper conductors	79
Annex G (informative) Potential stator winding discharge risk assessment – Ignition risk factors	81
Annex H (normative) Test procedure for T8, T10 and T12 lamps	83
Annex I (informative) Introduction of an alternative risk assessment method encompassing 'Equipment Protection Levels' for Ex Equipment.....	89
Annex J (informative) Bibliography	95
Annex K (informative) United States major deviations	97
 Figure 1 – Determination of creepage distances and clearances	31
Figure 2 – Minimum values of the time t_E of motors in relation to the starting current ratio I_A/I_N	39
Figure 3 – Arrangement for the luminaire vibration test	58
Figure A.1 – Diagram illustrating the determination of time t_E	70
Figure E.1 – Example of defined terminal/conductor arrangement table.....	78
Figure H.1 – Asymmetric pulse test circuit.....	84
Figure H.2 – Asymmetric power detection circuit.....	86
Figure H.3 – Flow Chart – Asymmetric power Test.....	87
 Table 1 – Creepage distances and clearances.....	27
Table 2 – Tracking resistance of insulating materials	31
Table 3 – Limiting temperatures for insulated windings	34
Table 4 – Potential air gap sparking risk assessment for cage rotor ignition risk factors.....	38
Table 5 – Minimum distance between lamp and protective cover.....	41
Table 6 – Creepage distances and clearances for screw lamp caps	42
Table 7 – Resistance to the effect of short-circuit currents	46
Table 8 – Explosion test mixtures.....	56
Table 9 – Insertion torque and minimum removal torque	57
Table 10 – Value for pull-out tests.....	64
Table 11 – Creepage distances and clearances for screw lamp caps	67
Table 12 – Text of warning markings	68
Table F.1 – Standard cross-sections of copper conductors	79
Table G.1 – Potential stator winding discharge risk assessment – Ignition risk factors	81
Table I.1 – Traditional relationship of EPLs to Zones (no additional risk assessment)	91
Table I.2 – Description of risk of ignition protection provided.....	92
