<b>1</b>	<b>Introduction</b>	<b>1</b>
Goal . . . . .	3	
Conceptual Approach . . . . .	3	
Task Definition . . . . .	4	
<b>2</b>	<b>IEC 61499 a Base Model for Reconfigurable Control Systems</b>	<b>7</b>
Overview of the IEC 61499 Family of Standards . . . . .	7	
Short Introduction to IEC 61499 . . . . .	8	
Existing Execution Approaches for IEC 61499 . . . . .	12	
Reconfiguring IEC 61499 Control Applications . . . . .	17	
Summary . . . . .	18	
<b>3</b>	<b>Reconfiguration of Embedded Control Software</b>	<b>21</b>
Basic Definitions . . . . .	21	
Existing Work on Reconfigurable Software Infrastructures	22	
Requirements for Dynamic Reconfiguration Support . . . . .	26	
Reconfiguration Aptitude of Industrial Control Systems . .	28	
IEC 61131-3 . . . . .	28	
IEC 61499 . . . . .	30	
Summary . . . . .	33	
<b>4</b>	<b>Real-Time Execution of Embedded Control Software</b>	<b>35</b>
Basic Definitions . . . . .	35	
Real-Time System Constraints . . . . .	39	
Absolute Timing Constraints . . . . .	39	
Relative Timing Constraints . . . . .	40	
Resource Constraints . . . . .	41	
Process Models . . . . .	41	
Periodic Occurrence Model . . . . .	42	
Aperiodic Occurrence Models . . . . .	42	
Overview of Real-Time Scheduling Algorithms . . . . .	44	
Task Activation Models . . . . .	45	

Classification of Scheduling Algorithms . . . . .	45
Basic Scheduling Algorithms . . . . .	46
Derived Scheduling Algorithms . . . . .	47
Summary . . . . .	48
<b>5 Reconfiguration Approach</b>	<b>51</b>
Introduction . . . . .	51
Reconfiguration Model . . . . .	52
Identification of Reconfiguration Services . . . . .	55
Derivation of Reconfiguration Services . . . . .	56
Compilation of Basic Reconfiguration Services . . .	59
Necessary Extensions to the Basic Reconfiguration Sup- port of IEC 61499 . . . . .	63
Handling Vendor-Independent Function Block Type Definitions . . . . .	63
Derived Data Types . . . . .	75
Interacting with Function Block Internals . . . . .	75
Execution Environment Support for Reconfiguration Ap- plications . . . . .	77
Language for Programming Reconfiguration Appli- cations . . . . .	77
Interaction Between Reconfiguration Application and Control Application . . . . .	78
Provision of Basic Reconfiguration Services . . . . .	79
Management Model . . . . .	83
Execution of Reconfiguration Applications . . . . .	86
Summary . . . . .	88
<b>6 A New IEC 61499 Real-Time Execution Model</b>	<b>91</b>
Execution Requirements for Reconfigurable Control Models	91
Deriving a new Execution Approach for IEC 61499 . . . .	93
Analysis of the IEC 61499 Execution Model . . . . .	93
Mapping the IEC 61499 Modeling Elements to Existing Real-Time Scheduling Theory . . . . .	98
The Event Chain Concept . . . . .	102
Structural and Behavioral Attributes of Event Chains	103
An IEC 61499 Execution Environment Based on the Event Chain Concept . . . . .	108
Execution of Function Block Networks within Event Chains . . . . .	110

Execution of Event Chains . . . . .	118
Resulting Task-set . . . . .	122
Derived Scheduling and Execution Parameters . . . . .	123
Worst-Case Execution Time of Event Chains . . . . .	124
Arrival Times for Event Chain Branches . . . . .	127
Providing the Scheduling and Execution Parameters to the Execution Environment . . . . .	134
Managing External Events . . . . .	135
Guaranteeing Real-Time Execution . . . . .	139
General Execution Properties of the Resulting Task-set	139
Worst-Case Active Task-Set . . . . .	142
Static Priority Scheduling of General Task-sets . . .	143
Dynamic Priority Scheduling of General Task-sets .	146
Considerations on Task Blocking . . . . .	147
Guidelines for Real-Time Constrained Control Applica- tion Design . . . . .	148
Considerations on Executing Reconfiguration Applications	149
Setup Phase of Reconfiguration Applications . . . .	151
Execution Phase of Reconfiguration Applications .	151
Shutdown Phase of Reconfiguration Applications .	152
Resulting Execution Environment Design . . . . .	153
<b>7 Tests and Measurements</b>	<b>157</b>
Test Environment . . . . .	157
IEC 61499 Execution Environment . . . . .	158
Control Devices . . . . .	158
Measurement Setup . . . . .	161
Test Event Chain . . . . .	163
Real-Time Execution Experiments . . . . .	165
Independent Real-Time Constrained Event Chains .	166
Decoupled Event Chain Branches . . . . .	172
Discussion of Real-Time Execution Experiments .	176
Real-Time Reconfiguration Experiments . . . . .	178
Disturbances Resulting from the External Reconfig- uration Interface . . . . .	179
Disturbances Resulting from the Internal Reconfig- uration Interface . . . . .	181
Discussion of Real-Time Reconfiguration Experiments	186
Summary . . . . .	187

<b>8 Real-World Control Application</b>	<b>191</b>
Experimental Setup . . . . .	191
Parameter Normalization . . . . .	192
Closed Loop Control Experiments . . . . .	194
Improved Position Control of the Inverted Pendulum	195
Results . . . . .	196
Reconfiguration Experiment . . . . .	198
Setup Phase . . . . .	198
Execution Phase . . . . .	200
Shutdown Phase . . . . .	202
Results . . . . .	203
Discussion of Real-World Control Application Experiments . . . . .	205
Summary . . . . .	207
<b>9 Future Steps Toward Adaptive Production Systems</b>	<b>209</b>
Summarization of the Achieved Results . . . . .	209
Next Steps . . . . .	213
Real-Time Execution of IEC 61499 . . . . .	213
Dynamic Reconfiguration Support . . . . .	216
Long-Term Vision . . . . .	219
<b>A Description of the Basic Reconfiguration Services</b>	<b>221</b>
General Structure of the External Reconfiguration Interface	222
Structural Services . . . . .	225
Library Services . . . . .	229
Execution Control Services . . . . .	230
State Interaction Services . . . . .	232
Query Services . . . . .	233
<b>B Compact XML-Encoding for IEC 61499 Types</b>	<b>237</b>
<b>C Real-Time Event Function Blocks</b>	<b>239</b>
