

Press Release

FOR RELEASE: Immediate
Contact: Gini Kyle, Marketing Manager
Veris, Inc., 6315 Monarch Park Place, Niwot, CO 80503
Tel: (303) 652-8550 Fax: (303) 652-8552 Toll Free: 1-877-837-4700
E-mail: gini@veris-inc.com Website: www.veris-inc.com

ACCELABAR®

New from Veris Engineering – The Accelabar® is a unique flow meter that combines two differential pressure technologies to produce high accuracy with **no straight run requirements** over operating ranges **never before** attainable in a single meter.

The Accelabar combines a unique nozzle design with a Verabar® averaging pitot sensor. The nozzle has a patented straight run “settling distance” that accelerates, linearizes and stabilizes the velocity profile sensed by the Verabar. The Verabar located within the nozzle produces and substantially increases the differential pressure output resulting in operating ranges tested up to 65:1. Independent testing verifies that the Accelabar has a constant flow coefficient over the entire flow range producing an accuracy of $\pm 0.5\%$ and repeatability of $\pm 0.05\%$. Please contact us toll free for a brochure at 1-877-837-4700 or email us at contact@veris-inc.com. Visit our website at www.veris-inc.com.
