Moxa Unveils Industrial-grade OnCell 5004 Cellular Router for M2M Applications

Brea, California, Aug. 1st, 2009—Moxa is pleased to introduce the OnCell 5004, which is a GSM/GPRS industrial cellular router that connects up to 4 Ethernet devices to a cellular network for remote sites and devices. The OnCell 5004 cellular router provides the functionality of a cellular router, firewall, and switch in one device, and is the industry's first standalone platform of this type. The OnCell 5004 is an intelligent industrial strength multi-functional cellular communication platform, and is ideal for upgrading M2M applications to cellular.

The OnCell 5004 cellular router is a robust, reliable, and high-performance machine. The OnCell 5004 uses 12 to 48 VDC power inputs with a screw-on design for greater reliability, operates in a wide temperature range of -30 to 55°C, and is housed in an aluminum form factor that is IP30 protected. The OnCell 5004 is equipped with advanced features, such as one WAN and four LAN interfaces, which are protected by 1.5 KV magnetic isolation to keep your system safe from unexpected electrical discharges. The highly flexible design of the OnCell 5004 allows LAN ports to connect to a cellular WAN using a single cellular data account for primary and backup wireless WAN connectivity, and along with a dual SIM card tray with automatic SIM switchover, the OnCell 5004 is ideal for any industrial applications, especially environmental monitoring systems and transportation applications.

Key Features:

- . Quad-band GSM/GPRS 850/900/1800/1900 MHz
- . 4-port 10/100M Ethernet to GSM/GPRS cellular router
- . Connects up to 4 10/100BaseT(X) devices
- . Wireless WAN connectivity
- . [Centralized private IP management software](#)
- . Power redundancy
- . DIN-Rail and wall mountable housing

More information about Moxa's OnCell 5004 Cellular Router is available at www.moxa.com/product/OnCell_5004_series.htm.

About Moxa

Moxa manufactures a wide array of device networking products for industrial automation. Information about all Moxa products, which include embedded computers, Ethernet switches, wireless solutions, serial device servers, multiport serial boards, media converters, USB-to-serial converters, embedded device servers, video networking products, and active I/O solutions, is available on Moxa's corporate website at www.moxa.com. You may also contact Moxa directly by email at info@moxa.com, or by phoning +886 (2) 8919-1230.
