NEW DIN-Rail AC Receptacles offer Design Flexibility and Reduced Installation Time

RICHMOND, VA (July 7, 2009) – Weidmuller announces the introduction of a new line of AC DIN-rail receptacles– the new DRAC Line. These DIN-rail receptacles are a further addition to Weidmuller’s existing line of simplex, duplex, and GFCI in-panel receptacles. The DRAC line provides users with a convenient power source inside the control cabinet for laptops, test equipment, lighting, solder irons and much more.

Compact at only 2.9” wide and 4.6” high, Weidmuller’s new DRAC line of DIN-rail receptacles are fully enclosed and touch safe. They include 15A or 20A power outlets that provide a simple and convenient power source inside a panel or enclosure.

The DRAC line offers design flexibility and savings on installation time. The receptacles are ready to install right out of the box, and can be installed onto 35mm DIN-rail or, for added convenience, directly panel-mounted. The receptacles accept solid or stranded wiring from 20AWG to 10AWG.

“With these new maintenance outlets a technician has the convenience of pulling the product out of the box in one piece, snapping it to the DIN-Rail and terminating a few wires in the matter a minutes,” said Tobin Robertson, Product Manager.

The DRAC line is UL approved for use in any UL panel or control system. The UL508A and cULus approvals coupled with NEMA ratings make it effortless to add to a control cabinet or system.

For additional product information, go to www.weidmuller.com.

Weidmuller is the leading provider of solutions for the transmission of power, data and control signals in industrial environments. The company develops, produces and sells industrial electronics, network infrastructure components and connectivity solutions such as Wireless Solutions, Industrial Ethernet, Relays, Power Supplies, I/O modules, printed circuit board connectors, terminal blocks and complete DIN Rail assemblies. The Weidmuller group has a strong international focus with manufacturing and sales locations in over 70 countries.
