

# Is it time to join a committee?

Serving on a committee is a great way to help our Section and to sharpen your leadership skills. We have over a dozen committees, from education to exhibits to treasurer, and more. Surely there's a good fit for you!

Just let any of our leaders know the committee in which you are interested. They'll give you the information you need to make your decision. Volunteering on a committee is a great way to learn new skills while you network with other motivated automation professionals. Our Section benefits, and you do too!
