## ISA's 10<sup>th</sup> Annual Fugitive Emissions—LDAR Symposium

### Exhibitor and Sponsorship Prospectus

Now in its 10th year, the ISA Fugitive Emissions Leak Detection and Repair (LDAR) Training & Symposium has distinguished itself as the singular “go-to” event for industry professionals concerned with fugitive emissions, leak detection and repair. It has become the air compliance industry's only conference focused on best practices for leak detection and repair and directed inspection and maintenance programs.

This flourishing symposium now attracts over 250 LDAR experts, industry professionals, and regulators from around the world. The best way to get your products and services in front of this influential group of LDAR program administrators, LDAR coordinators and supervisors, air compliance managers, environmental engineers, maintenance managers, reliability engineers, consultants, monitoring services contractors, and users involved with these technologies is through sponsorship and exhibiting at this year's event.

The symposium is scheduled so that conference sessions and exhibit hours do not overlap. Exhibitors will have the full attention of conferees when they meet with them to discuss solutions and applications during conference breaks, meals, and receptions over a two-day period.

Further your own education and networking opportunities while the conference is in session—your exhibit space include one (1) full conference registration with scheduled luncheons.

See next page for sponsorship and exhibitor opportunities and floorplan.
