

ASM Materials CampSM

Do you know a high school sophomore or junior interested in science or engineering who would like to spend time next summer learning about materials science? The three to six days at camp is **almost free** (transportation not included) and there are residential and commuter camps at over twenty places across the country.

Do you know a high school science teacher who would like to spend time next summer learning about materials science? The five to six day camp is **almost free** (transportation not included) and there are residential and commuter camps at twenty places across the country. They may even get CEUs for the effort.

These camps are mentored by world-renowned experts in metallurgy and materials science who volunteer their services, and at locations where the students are exposed to the latest analytical equipment and techniques.

We have the list of camps and dates for 2007 as well as the application forms. Forms must be returned to ASM by March 31, 2007.

For application forms and camp schedules, contact:

- Dan Elliott at (717) 854-5884 or dseinc@yahoo.com.
- Dr. Marsha Bischel at (717) 396-4169 or msbischel@armstrong.com.
- Jeane Deatherage at jeane.deatherage@asminternational.org.

Who pays for all this? We do through our donations to the ASM Foundation. For more information go to: www.asmiinternational.org/foundation.
