CHART

SEPTEMBER 2000

Foundation Fieldbus Digital Bus Technology

Program:

Demonstration on Foundation Fieldbus

- The engineering and configuration methodology associated with Foundation Fieldbus in a typical host system
- An in-depth, hands-on view of the various categories of information that can be obtained from field instrumentation via field-based device networks such as Foundation Fieldbus.
- Review of AS-I bus, and Profibus DP (and future DeviceNET) network capability within a typical host system.

Speakers:

Wayne Lukehart, Fisher-Rosemount

Wayne is a Technology Consultant for Fisher-Rosemount working in the Southern California area. He has been associated with the sale and implementation of control systems over the last 25 years.

Mike Manta, Caltrol, Inc.

Mike has recently moved to Southern California working as a System Consultant for Caltrol, Inc. He has been associated with Fisher-Rosemount in Austin, Texas for the last 10 years as a Project Manager and worked as an end-user in the paper industry during the previous 15 years.
