Overview of Software Products for Wireless Application

Speakers: Patrick Coakley and Andrew Cappello

Presentation:

LibertyScope, a developer of innovative wireless software products, will discuss the release of its EnableAir Suite and EnableAir Designer for the creation and wireless deployment of mission-critical application data over local and wide area wireless network.

EnableAir Suite provides the delivery of graphic rich data over low—and high-bandwidth connections. The EnableAir Designer is an easy-to-use GUI design tool that creates screens and layouts for the remote devices.

Speakers:

Patrick Coakley is a LibertyScope co-founder and leads the company's technical direction. Mr. Coakley holds a Bachelor of Science degree in Computer Science and Engineering from UCLA.

Andrew Cappello is the chief software architect and co-founder of LibertScope. He holds a Bachelor of Science degree in Information and Computer Science from the University of California Irvine.

Meeting Notes:

Check out our website: www.isa.org/~oranc/

Date: Wednesday, November 14, 2001

Place: Park Place, CN-10 (37-10), 3353 Michelson Dr., Irvine, CA

Time: Social hour—5:00 p.m. □ Technical Program—5:45 p.m.

Christmas Dinner and Award Ceremony

Please join the ISA-Orange County and ISA-Los Angeles Sections at their Annual Christmas Dinner and Award Ceremony on December 8, 2001 at the Petroleum Club in Long Beach. This year's Don Zee Award winner will be Bob Cole, who is retired from Fluor Daniel Corporation.

Tickets are on sale now.

A table of eight is \$250.00 and the cost per person is \$35.00. Please call Bis Mitra for reservations.

Phone: (949) 349-3270 □ e-mail: biswajit.mitra@fluor.com.
