January 2002

Overview of Digital Bus Technology

By Mike Mantha, Caltrol

January 9, 2002

Presentation:

Mike Mantha will discuss different digital bus technology including AS-i, Profibus, Devicenet, and Foundation Fieldbus. For each of the bus technologies, he will cover:

- terminology
- basic design
- engineering practices
- communications.

Meeting Notes:

Check out our web site:

www.isa.org/~oranc/

Date Wednesday, January 9, 2002

Place: Park Place CN-10 (37-10),

3353 Michelson Dr., Irvine, CA 92612

Time: Social hour 5:00 p.m.

Technical Program 5:45 p.m.

Sponsors:

Emerson Process Management

Speaker:

Mike is a Technical Consultant with Caltrol in Southern California. He has assumed many successful leadership positions over the past 27 years in the process control industry. His diverse experience and expertise in the process control, instrumentation and automation field makes him well equipped for consulting in most industries. He works with customers, systems integrators and various Emerson divisions to define and scope automation and process control projects. He is trained in DeltaV continuous and batch configuration, as well as process instrumentation and uses this with his extensive process knowledge, to ensure successful projects for clients.

Education:

Bachelor of Science, Electrical Engineering,
Cambrian College
