Getting The Most Out Of Plant Data

Abstract

Most manufacturing plants abound in data, much of which is never used effectively. A combination of existing, but underutilized, and new technologies can significantly increase the operational value of existing plant data.

About the Speaker

Elliott Middleton is Wonderware's product manager for Advanced Client Technology. He has 15 years experience working with manufacturers seeking to improve plant operations by a better understanding of their processes.

He has worked with manufacturers in process, consumer goods, food and beverage, pharmaceutical industries identifying technology solutions to operational problems. Prior to joining Wonderware, Mr. Middleton worked with IndX Software and Aspen Technology.
