March 2002

# I E n t e r p r i s e / C o n t r o l t g r a t i o n

**By Ed Britt  
Rockwell  
Automation**

### *Presentation:*

The discussion will highlight Standard S-95, defining the data model between Enterprise Resource Planning (ERP) and the factory floor. With the Y2K remediation efforts complete, a major investment has been made in ERP solutions and manufacturing systems. Manufacturers are still suffering from a significant gap between the two systems. S-95 closes that gap.

### *Speaker:*

Ed Britt is a Regional Software Manager for Rockwell Automation in Southern California. Ed has 24 years of manufacturing industry experience in Southern California. For the past nine years, he has focused on automation, software and manufacturing businessware.

### *Sponsors:*

- ✓ Rockwell Automation
- ✓ SC Controls, Inc.
