## Save Energy Through Compressed Air Optimization

*Speaker: Eric Bessey, SAV-AIR*

### PROGRAM

Air is free, but compressed air is expensive! In many industrial facilities, air compressors use more electricity than any other type of equipment. Energy savings from systems improvements can range from 20-50% or more of electricity consumption. Eric will explain how a properly managed compressed air system can save energy, reduce maintenance, decrease downtime, increase production throughput, and improve product quality.

### SPEAKER

Eric Bessey is the Air Systems analyst and leads air system evaluations for SAV-AIR. SAV-AIR provides integrated compressed air management and control systems and engineering services for a broad range of industrial customers. He holds a masters degree in mechanical engineering and has led compressed air system analysis software and audit methodology projects during his eight years of experience in the compressed air industry. In addition, Eric developed AirMaster, a nationally-recognized software program for calculating compressor efficiency.

### MEETING NOTES:

**Check out our web site:** [www.isa.org/~oranc/](http://www.isa.org/~oranc/)

DATE: Wednesday, November 13, 2002

PLACE: Park Place CN-150 (37-150), 3353 Michelson Dr., Irvine, CA 92612

TIME: Social hour—5:00 p.m. ■ Technical Program—5:45 p.m.

### UPCOMING EVENTS

**Tuesday, December 3**

ISA Training Seminar—"An Overview of Measurement and Controls Fundamentals," Holiday Inn - La Mirada, CA

**Saturday December 7**

Christmas Party @ Long Beach Petroleum Club

**January 8**

Monthly Meeting—"Steam and Water Quality Measurement in Power Plants," Joe Covey, Rosemount Analytical

**February 13**

Monthly Meeting—Desalination Process Using Reverse Osmosis"

### Mark Your Calendar

**December 7:**

**Christmas Dinner and Awards Ceremony**  
**The Petroleum Club in Long Beach**

**Tickets: \$38.00/person**

Table of 8: \$250.00

Table of 9: \$280.00

Table of 10: \$310.00
