SEAWATER DESALINATION PROCESS

**Speaker: Mr. Nikolay Voutchkov,
Poseidon Resources Corporation**

PROGRAM

Poseidon Resources is a company specializing in developing and financing water projects with a focus on seawater desalination and membrane water treatment and reuse. The company is involved with a 25 mgd Tampa Bay Seawater desalination project, currently the largest desalination project in United States. This program will focus on the desalination technology and its application in the power plants in the Southern California region.

SPEAKER

Mr. Voutchkov has more than 20 years of experience in the development, design, construction, startup and operation of municipal and industrial desalination facilities and water and wastewater plants.

Currently, he is a Vice President of Technical Services for Poseidon Resources Corporation. Poseidon Resources is a private investment company located in Stamford, Connecticut, which specializes in developing and financing water and wastewater projects worldwide. Mr. Voutchkov is responsible for the technical evaluation, implementation, construction, permitting and operation of all company projects, including the largest seawater desalination project in the U.S.—the 25 mgd Tampa Bay Project. He is a registered professional engineer and a diplomate of the American Academy of Environmental Engineers.
