**VERIS**

## AEROFIN

- Lube Oil coolers
- Air Handling Units
- Heating / Cooling Coils

## ARMSTRONG INTERNATIONAL

- Steam Traps/Strainers
- Air Vents
- Pressure/Temperature Regulators
- Condensate Pumps

## ASHCROFT

- Gauges
- Switches

## BURKERT CONTROMATIC

- Solenoid Valves
- Control Valves

## ITT CONOFLOW

- Pressure/Filter Regulators
- Transducers
- Signal Converters

## NELSON ELECTRIC

- Electric Heat Tracing

## QUALITY METAL WORKS

- Enclosures
- Control Panels

## STAR FABRICATORS

- Custom Fabrication
- Process Skid Assembly
- Packaged Systems

## UNITED ELECTRIC

- Pressure/Temperature Switches
- RTD's
- Thermocouples

## VERIS

- Verabar Flow Elements
- Flow Computers
- Transmitters

## WIKA

- Pressure Gauges
- Transducers/Thermometers
- Test and Calibration Equipment

## Control Center Capabilities

### Manufactured Products and Systems

Control Center has the proven ability to design and manufacture complex systems to demanding build to print or functional specifications. Control Center's quality system conforms to ISO 9001 and when coupled with Six Sigma methodology ensures a robust design, approved manufacturing procedures and timely completion at the lowest possible cost.

- Modular Integrated Skids
- Flow Systems
- Panels
- Interconnect Pipe
- Modification and Upgrades
- Heat Trace

### Engineering Services

Control Center provides consulting and field service engineers to the power generation, petroleum, chemical, process, energy, and other industries. Our extensive product knowledge in the areas of fluid systems, instrumentation & controls, and mechanical and electrical engineering allows us to efficiently solve the operational and maintenance issues that you face. We offer service packages in the following general categories and will be happy to customize services to meet your requirements.

- Operation and Maintenance Support
- Instrumentation and Controls Services
- Training Services
- Installation Services

### Parts Distribution Services

Control Center has been applying and sourcing a wide range of high technology products for complex systems as well as commodity components for nearly 40 years.

- Measurement
- Control
- Valves
- Steam Systems
- Supply Management
- Filtration
- Separation
- Heat Transfer
- Component Packaging
- BOP Components & Commodities
