

Construction

- Electrical From Commercial Buildings to Heavy Industrial Plants.
Power Distribution Systems up to 200KV
Lighting, Control and Grounding Systems.
- Instrumentation From Calibration of one instrument to Design/Build of large PLC
and Distributed Control Systems with Programming.

Engineering

- Consulting Electrical, Instrumentation, and Process Control.
Specifications and Construction Management Services.
Inspections
- Design Electrical and Instrumentation Systems.
Software Development, Industrial and Process Control Systems,
Communications Systems.

Services

- | | |
|----------------------------|---|
| 24 Hour Call Out | - Electrical and Instrumentation Services |
| Project Management | - Electrical and Instrumentation Construction |
| Maintenance | - Electrical and Instrumentation |
| Plant Electrical Relaying | - Studies and Calibration |
| CAD Drawings | - Documentation |
| Process Simulator Software | - Process Training and Efficiency Studies |
| Process Computer Software | - Process Control, DCS, PLC, Telemetry |
| Process Computer Systems | - Hardware and Software Analysts |

Control Panels

- Panel Fabrication UL Panels, Design, Build.
