Next Meeting Date: August 21, 2019
Place: Monument Inn Restaurant
4406 Independence Parkway
La Porte, TX 77571
Time: Arrival/Check-In: 5:30 - 6:30 PM
Dinner & Presentation: 6:30 - 8:30 PM
Speaker: TBD
Topic: TBD
RSVP: To RSVP please email Court Sullivan (court.sullivan@us.yokogawa.com) by August 19th.

Shrimp Boil Sponsorships!
The ISA Houston Analysis Subsection hosts an extremely successful Shrimp Boil each year on the first Friday after Labor Day (06 September 2019) at the Harris County Park White Top Pavilion on NASA Parkway (NASA Road 1). Over 700# of shrimp, potatoes, corn, etc. are prepared by volunteers and served to 450+ attendees.

Sponsorships are still available (until August 20th) which provide a means of recognition and opportunities for companies to participate in the event. Sponsors’ names and logos will be presented on banners displayed within the pavilion.

Attached is a document providing details for sponsoring the Houston Analysis Subsection Annual Shrimp Boil. We welcome your participation and attendance.
ISA Houston Analysis Subsection

43rd Annual Shrimp Boil

Date: Friday 06 September 2019

Time: 4 PM – 8 PM or until the Shrimp and Beverages are consumed

Tickets **NOW** Available

Tickets: Contact Dale Merriman for purchase & pickup/mailing, however tickets can be purchased at the event.

Email: dcmerriman@sbcglobal.net or 713.978.7765

Cost: $15 for the best Shrimp on the Gulf Coast

Place: Pavilion at Clear Lake Park 5001 NASA Parkway (FM 528)

(*BBQ Pit & Covered Pavilion*) on the south side of NASA Parkway
Analyzers that work.

Install dependable liquid and gas analyzers that measure H2S, CO2, total sulfur, hydrocarbons, and oil.

Liquid Analyzers:
- Hydrocarbons/VOC in Water
- Oil in Water
- H2S in Liquids (crude, water, diesel, & more)

Gas Analyzers:
- H2S
- CO2
- Sulfur

www.LiquidGasAnalyzers.com
Phone: (281) 516-3950 | Fax: (281) 351-8925 | sales@asikeco.com

Hazardous Certified Heaters

- Ratings
  - Voltages: 24 to 277 VAC/VDC
  - Power Output: 25 to 600 Watts
  - Certifications: Worldwide Approvals
  - Constant Power and Self-Limiting
  - Freeze Protection (50°F) and Temperature Maintain (Up To 300°F)

11050 West Little York Road, Building M, Houston, TX, 77041  866-381-8350
255 Henry Drive, Sarnia, ON, N7T 7H5  888-875-8756
INTELLIGENT SOLUTIONS FOR CONTINUOUS GAS ANALYSIS

THIS IS SICK
Sensor Intelligence.

Automation and continuous monitoring of industrial processes are essential to achieve the best profitability and safety for chemical and petrochemical production plants. SICK offers a broad product portfolio for gas analysis, flow metering and particulate measurement. The devices use cutting-edge technology and cover extractive as well as in-situ techniques. They are designed to cope with aggressive environments and hazardous process conditions. We support our customers with intelligent, tailor-made solutions, which include sample conditioning systems and system integration. With a strong, expanding presence across the country, SICK is able to provide full after-sales support covering spare parts, repairs, field service and customer training. We think that’s intelligent. www.sickusa.com.

NOW YOU HAVE A CHOICE

- Made in the USA
- Same or better performance
- Increased reliability – better cycle life
- Little or no cost of change – in fact, you’ll reduce costs
- ‘Drop in Fit’ dimensions match popular industry designs
- Industry’s only blowout proof stem

The largest money saving application within a refinery is in the Crude Unit!

Use real-time monitoring with RAMAN Technology to optimize diesel production!

Using Real-time monitoring via Raman Technology can:
- Optimize Cloud Point Window – Drop window by 2°F
- Optimize 90% Cut Point – Increase by 2°F
- Optimize Flash Point – Increase by 2°F Result, blend more heavy Naphtha into diesel product, produce less vacuum oil products.

Customer’s Estimated Savings:
$1,000,000 / month based on blending 40,000 bpd of diesel
EcoChem Analytics
Process and Continuous Emissions Monitoring Systems (CEMS)

281-338-9888
www.ecochem.biz

Turn-key Systems, Building Shelters or Mobile-Trailers -- Buy or Lease

All major components manufactured by EcoChem -- Single provider takes total responsibility

EcoChem’s MC3 Multicomponent analyzer can measure up to 8 gases simultaneously (out of NOx, NH3, N2O, SO2, CO, HCl, HF, HCN, CO2, H2O and O2)

Case Study:
Selective Catalytic Reduction (SCR)

For an SCR process, measuring NOx and Ammonia slip in real-time has significant benefits:
-- High ammonia injection leads to excessively low NOx and high ammonia slip (higher operating costs)
-- Low ammonia injection results in high NOx and excess emissions (possible regulatory violations)

EcoChem’s MC3 System can help you do better process control and operate at optimal levels.

Engineered, Manufactured and Supported Locally from League City, TX

CALENDAR OF EVENTS

2019 Events

February Meeting w/ Speaker James Dorsey (Feb 20 @ Monument Inn Restaurant)
64th ISA Analysis Division Symposium (May 5-9 @ Galveston Convention Center)
June Meeting w/ Speaker Dr. David Hailey (Jun 19 @ Monument Inn Restaurant)
August Meeting w/ Speaker (Aug 21 @ Monument Inn Restaurant)
October Meeting w/ Speaker (Oct 16 @ Monument Inn Restaurant)
December Annual Christmas Dinner Meeting (Dec 18 @ Monument Inn Restaurant)

ALLEVIATE THE PAIN OF MEASURING pH

M4 Knick’s Memosens pH Sensors Are Built with You in Mind:

- Pre-calibrate ahead of time, in shop or lab, and on your schedule
- Drift & noise are non-existent with inductive, all plastic connection
- Easily replace sensors with quick disconnect at the sensor head
- Eliminate the guess work with sensor health diagnostics
- Proven and repeatable sensor performance

Call DMS at 713-541-9800 to see how Memosens is changing the status quo.

A Proud Partner of

Complete Process Analytical Solutions
Your Process Analyzer Expertise That Doesn't Retire

We provide leading edge products, from Process Gas Chromatography, Continuous Gas Analyzers to Laser Spectroscopy. We utilize front-end turnkey engineering to provide the best analytical solution. Engineering turnkey system solutions ensures single responsibility, dependability and risk mitigation for you. Our best-in-class life cycle support ensures the highest online analytical measurement utilization.

Process Analyzers, Integration & Service

Yokogawa is a recognized world leader in the field of analytical equipment with one of the most comprehensive families of sensors and on-line analyzers and expert execution of both large program projects as well as small end-user upgrades.

Over 40 years of analytical system integration experience

- Analyzer & CEMS Shelters
- CEMS Integration
- Field Service & Support
- FEED Studies
- 3rd Party Equipment Integration
- Startup & Commissioning Services
- Process Analytics
- Engineering, Consulting, and Fabrication Services
- Training

DIA-VAC® Pumps

FEATURES

- Full Engineering Support
- Minimal maintenance
- Emergency shipments in 1 day
- Modified stroke for custom performance
- Leak free
- Oil free
- Contamination Free
- Explosion proof to NEC, ATEX, IECEX, CUTR
- Flow rates up to 200 LPM
- Pressure up to 5 barG
- Built to last for tough applications
- Corrosion resistant to stack & process gases
- Zone/Division II options

UL Division I Group B Zone 1 IIIB + H2

CSA Division I Group B Zone 1 IIIB + H2

Ex Zone 1 Exd IIC

IECEX Zone 1 Exd IIC

EXPERTS IN SAMPLE PUMPS FOR PROCESS & CEMS ANALYZERS SINCE 1971

For over 40 years, Air Dimensions has provided the gas analytical industry with high quality diaphragm pumps for all your sampling needs. Our unique modified eccentric stroke option allows you to tailor the pump capacity to your requirements, resulting in a well balanced system and extended life of the pump. Contact our team today and learn more about how Dia-Vac® pumps are setting the standard in performance and delivery.

At ADI, we pass your gas at the speed of need.
Orbital is committed to providing solutions to your specific application, ensuring the best results by always putting their customer's needs first. Orbital is analyzer neutral so any analyzer brand can be readily integrated into the project based on the needs of the project, making Orbital highly versatile and suitable for an extensive range of applications.

**Orbital wide range of expertise spans:**
- EPA regulation/CEMS
- Petrochemical
- Refining
- Fracking
- Process Control
- LNG
- Pharmaceutical
- Utilities/Liquid Sources
- Biogas
- And many others

**Orbital offers a range of services:**
- Front-End Engineering Design
- Analytical Systems Integration
- Startup, Commissioning
- Field Services
- Field Installation Services
- Training

**Orbital has expertise in the following technologies:**
- Chromatography/TCD, FPD, FID
- TDL/QCL
- NIR/IR
- Spectrometry
- pH, Conductivity, Turbidity
- Coriolis
- Atomic Fluorescence
- Tape Based Analyzers
- And many others

Both Orbital's 39,000 sq ft US and 46,000 sq ft UK facilities are ISO 9001:2015 accredited.

The GasPTI has a small footprint, doesn't need carrier gas, calibration gas and has a response time of less than ten seconds making it ideal for custody transfer and many other applications.

Orbital's VE Sample probes and Thermowell allow them to be inserted in any process conditions because the probe eliminates the vortex. This is due to innovative helical stakke design of the probe.

We understand how you need to reduce complexities at your plant.

CLEAN PROCESS + CLEAR PROGRESS

You strengthen your plant’s safety, productivity, and availability with innovations and resources.

Tunable diode laser absorption spectroscopy (TDLAS) - for higher plant availability

- Selective and specific analyte measurement in complex hydrocarbon gas streams
- Exceptionally fast response to analyte concentration changes facilitates process control and optimization
- Laser and detector components are isolated and protected from process gas and contaminants providing superior (> 95%) analyzer availability

Indefatigable!
Siemens Gas Analyzers

Siemens family of continuous gas analyzers are designed for harsh application demand providing years of long term reliable gas analysis measurement performance.

- Proven optimization and product quality in Hydrocarbon and Chemical processing plants
- Product purity in Air Separation, HYCO and CO2 plants
- Combustion efficiency in furnaces and boilers of CO, O2, CH4
- Emission monitoring according 40 CFR 60 of CO2, O3, NOx and SO2

Dependable performance, proven design, exceeding reliability. In one word: INDEfatIGABLE!
