Together we will set the standard for automation around the globe!

www.isa.org/join
ISA has benefited me technically and professionally. I got involved in my ISA section right out of college. This helped me meet other automation professionals all over the Kansas City area from different companies and industries. And being part of an ISA technical division has helped me interact with automation professionals all over the globe!

Ashley Weckwerth

Join the International Society of Automation

ISA is the professional home for engineers, technicians, leaders, and students engaged in industrial automation.

ISA is Your Organization

Join ISA to engage with peers and subject matter experts around the world, sharing and developing best practices to advance the profession. Build your resume and your reputation, but even better, use this opportunity to inspire the next generation of technical professionals.

We are creating the future of automation, and we need your skills, perspective, and insight to make it happen. Join us!

ISA, founded in 1945, is the global professional organization for automation. We develop standards and educate the industry on critical topics like safety, cybersecurity, instrumentation, control systems, and much more.
Brent Killins  
Westech Industrial Ltd.  
Burlington, Ontario, Canada  

“ISA has been an excellent networking opportunity for me throughout my career. All of the jobs I’ve had since joining were a result of networking within ISA. My management position draws from the leadership skills that I’ve developed through ISA and the trust I’ve gained from the other local section and district leaders in my area. I’d invite anyone who’s interested in coming out to ISA to find your local section event, join a technical division, and get involved in the community because it’s just a great set of people.”

Rory Moloney  
Johnson & Johnson  
Cork, Ireland  

“The most valuable thing about being an ISA member is that it gives me a communication channel to speak with others in the industry. It allows me to have conversations with a lot of folks who are passionate about automation and discuss how new technologies are being designed, how vendors are bringing them to the market, and how they’re being used in the industry.”

Engage  
YOUR NETWORK

Business begins, and ends, with relationships. The relationships you build at ISA can last a lifetime—you will find people to support you, jumpstart your growth and development, and positively impact your on-the-job performance.

- Network with professionals in your local area through geographic sections. Sections engage in the community to provide information, resources, and scholarships to advance the automation profession.
- Share case studies and best practices in a technical division. Divisions align members around specific technical areas of interest and expertise across a range of automation disciplines.
- Using ISA Connect, members and leaders around the world come together in online communities to engage in technical conversations and share best practices.
- ISA hosts topic-focused and industry-specific, face-to-face events in dozens of countries throughout the year, giving members a chance to hear expert speakers and panel discussions.
- ISA members can post resumes, search for jobs, or search for candidates to hire using ISA’s online job board.

The relationships you build at ISA can last a lifetime.

Dhahran, Saudi Arabia

"Joining ISA is a lifelong experience that we should all embrace. It has made a great impact on many people that I know, and it's made an impact on me. From learning the standards, best practices, being able to connect with others, writing papers, and participating in conferences where knowledge sharing is a great opportunity for all."

Jasmeen Virk  
Spartan Controls Ltd  
Calgary, Alberta, Canada

"As a graduate with a psychology degree, I came into this field without a background in automation. Joining ISA gave me an understanding of the industry. The access to the vast knowledge of the organization is a great resource for my professional growth."

Companies look for signs of passion and commitment from their employees. Meeting the basic requirements of a job is not enough—you need to bring additional skills and value to your company.

While our industries are constantly evolving, we help you stay on top of the latest trends and give you access to the technical resources you need to navigate today's complexities.

- Set yourself apart with an ISA certification. ISA offers unbiased, vendor-neutral training and certification programs where you can develop your skills through in-depth, real-world material. Courses are offered at a discount for ISA members online, in regional classrooms, and in plants and facilities worldwide.
- Contribute your insights and get published through ISA's newsletters, articles, blogs, and white papers. See your name in print and boost your professional reputation. Through ISA's publications, members have access to thousands of articles and technical papers at no charge.
- Developed by more than 4,000 experts, on safety, cybersecurity, enterprise integration, wireless technology, alarm management, and more, as a member, you can access ISA standards at no charge. You can also volunteer your time and expertise to developing the next consensus-based standard—and by doing so, you will be changing the world of automation.
- Share your expertise by presenting at a conference educational session focusing on the latest automation developments and real-world scenarios. Help your peers develop best practices, have an impact on the industry, and get recognized for your experience. Members receive discounted registration for these events.
- Raise your profile by attending local section events. Get to know your peers and expand your network. You never know what opportunities you will discover through the people you meet.
In my opinion, it’s very important for young professionals to become ISA members because this is a way to get information and to prepare for your professional life. Being a member means that you will be part of a vast network that, besides friendship, will offer you a lot of opportunities.

Joao Bassa  
MAHAM Engenharia Consultiva  
Campinas, São Paulo, Brazil

“Young professionals can leverage their opportunities by connecting with other professionals in different fields. From healthcare to pulp and paper to oil and gas, there are so many fields within the automation industry represented at ISA. I think ISA can help young professionals develop their communication and leadership skills, and has personally helped me get to where I am today. This is one of the main reasons why I think that students and young professionals should get involved with ISA.”

Shreya Nandiraju  
Fluid Life  
Edmonton, Alberta, Canada

When you are a part of something bigger than yourself, it shows. With purpose and passion in your work, you find a greater calling for your career. As a member of ISA, you become an integral piece in building a better industry. With every ISA experience, you will find a renewed sense of excitement for your profession.

Leadership in ISA brings opportunity to cultivate and practice the soft skills companies are challenged to find in their technical teams.

- Take on a leadership role at the local, technical, or international level to develop and improve skills like creativity, decision making, and effective communication.
- Build your confidence in critical thinking, brainstorming, strategic visioning, and financial planning.
- Mentor young people—the moments you spend with the next generation will change our future.
- Participate in advocacy efforts aimed at inspiring interest in technology, reminding governments around the globe about the importance of automation, and finding innovative solutions to workforce development challenges.
- Team up with your local section to present at schools, coach robotics teams, inform your community about automation and provide educational scholarships.

With every ISA experience, you will find a renewed sense of excitement for your profession.
When you are fresh out of college and moving into an industrial sector, you will need to know all kinds of information to work in an industrial environment. ISA is a platform where you can mitigate this gap. ISA provides training courses and standards that you have access to as a member that can help you improve. Also, through event activities that happen around ISA, you can learn a lot of revolutionary technologies that are emerging in the industry.

The International Society of Automation (isa.org) is a non-profit professional association founded in 1945 to create a better world through automation. ISA advances technical competence by connecting the automation community to achieve operational excellence. The organization develops widely-used global standards; certifies industry professionals; provides education and training; publishes books and technical articles; hosts conferences and exhibits; and provides networking and career development programs for its 40,000 members and 400,000 customers around the world.

ISA created the ISA Global Cybersecurity Alliance (isa.org/ISAGCA) to advance cybersecurity readiness and awareness in manufacturing and critical infrastructure facilities and processes. The Alliance brings end-user companies, automation and control systems providers, IT infrastructure providers, services providers, system integrators, and other cybersecurity stakeholder organizations together to proactively address growing threats.

ISA owns Automation.com, a leading online publisher of automation-related content, and is the founding sponsor of The Automation Federation (automationfederation.org), an association of non-profit organizations serving as “The Voice of Automation.” Through a wholly owned subsidiary, ISA bridges the gap between standards and their implementation with the ISA Security Compliance Institute (isasecure.org) and the ISA Wireless Compliance Institute (isa100wci.org).
