Presenter: MICHAEL HOFFMAN

Topic: Monitoring the Performance of an Analyzer – The Value of Data

Company: Siemens

Michael provides technical support for sales and systems integration activities at Siemens since 2007. Responsibilities in this role include direct interfacing with customers and vendors for Siemens Process Analytics products and solutions providing Analytical Products, Engineering Services, and Systems Integrations deliverables.

Prior to Siemens he was employed with BP, Innovene, and Ineos 26 years, working with the Propylene Ammoxidation, Acrylonitrile, Catalyst Manufacturing, Acetonitrile, HCN, and Acetone Cyanohydrin processes, Michael supported these processes/sites/projects either directly or through the analyzer network groups. These efforts paired analyzer reliability, advanced control techniques, and the implementation of analyzer data management technologies in chemicals, olefins, and refining locations.
