Fundamentals of Industrial Control
2nd Edition
D. A. Coggan, Editor

Practical Guides for Measurement and Control

ISA—The Instrumentation, Systems, and Automation Society
Table of Contents

Preface ix
Contributors xi

Chapter 1 Sensors 1
Applications of Instrumentation 1
Introduction to Sensor Fundamentals 2
Standards of Measurement 10
Level Measurement 11
Pressure Measurement 31
Flow Measurement 63
Thermometers 96
Weight Measurement 141
Bibliography 150
About the Authors 152

Chapter 2 Analytical Instrumentation 153
General Measurement Principals For Analyzers 154
Analyzers Targeting Specific Stream Elements 160
Analyzers for Measuring Bulk Properties 188
References 199
About the Authors 200

Chapter 3 Chemical Process Control 201
Introduction 201
Responsibilities of a Process Control Engineer 202
Types of Process and Control Diagrams 203
Operator Acceptance 205
Control Loop Hardware 206
Characterizing Dynamic Behavior 214
PID Control: Fundamental Characteristics of Proportional, Integral, and Derivative Action 219
PID Tuning 223
Advanced PID Control 233
Control of MIMO Processes 243
Model Predictive Control 245
Case Studies 249
References 265
About the Author 265
## Table of Contents

### Chapter 4  Final Control Elements  267
- Control Valves and Actuators—An Introduction  267
- Pressure Differential  278
- Control Valve Sizing  280
- Trim Design  296
- Actuators  296
- Valve Positioners and Accessories  300
- Reversible Electric Motor Drives  307
- Solenoid Valves  307
- Electric Motor Drive Control  309
- Regulators, Relief Valves, and Other Control Elements  312
- Summary  320
- Bibliography  321
- About the Author  322

### Chapter 5  Computer Technology  323
- The Digital Computer  323
- The Central Processing Unit (CPU)  326
- Computer Architecture: Components and Structure  329
- Computer Operating Environment  344
- Operating Systems  347
- Industrial Applications Software  358
- Artificial Intelligence  378
- Neural Networks  382
- Fuzzy Logic  389
- Case-Based Reasoning (CBR)  393
- Genetic Algorithms  395
- Combined Approaches  398
- Plant Floor Applications  398
- Communications  401
- Networks  411
- Enterprise Computing  440
- Internet  444
- References and Bibliography  454
- About the Authors  460

### Chapter 6  Control System Theory  461
- The Transfer Function  461
- Open and Closed Loops  462
- Block Diagrams  464
- Modeling  466
- Block Diagram Reduction Techniques  470
- Signal Flow Graphs  472
- Differential Equations  476
- Transform Calculus Using the Laplace Transform  477
- System Response and Bode Diagrams  479
- Stability  494
- Performance Indices  500
- Compensation  500
- The Z-Transform  501
# Table of Contents

State-Space Approach to Digital Control Systems 504
Predictive Control 507
Adaptive Control 508
Statistical Process Control 512
Expert Systems 513
Conclusion 514
References 515
About the Author 516

## Chapter 7 Analog and Digital Control Devices 517
- Automatic Controllers 517
- Analog Controllers and Auxiliary Devices 519
- Pneumatic Auxiliary Devices 525
- Electric and Electronic Controllers 529
- Electronic Auxiliary Devices 534
- Digital Controllers and Auxiliary Devices 540
- References 550
- About the Authors 550

## Chapter 8 Distributed Control Systems / Digital Automation Systems 551
- Introduction 551
- DCS Architecture 557
- DAS Defined 564
- System Architecture, Functionality, and Standards 565
- User Interfaces 575
- Basic DCS/DAS Software Modules and Functionality 581
- Installation 584
- Maintenance 594
- Purchasing Strategies 598
- Migration Solutions 600
- Conclusion 603
- References 603
- About the Authors 604

## Chapter 9 Programmable Logic Controllers 605
- Introduction 606
- Principles of Operation 607
- PLCs versus Other Types of Controllers 608
- Ladder Logic Concepts 611
- Processors 618
- The Memory System 626
- The Analog I/O System 652
- Special Function Interfacing 659
- Programming Languages 664
- PLC System Documentation 668
- Implementing and Programming the PLC 676
- Guidelines for Installation, Startup, and Maintenance 685
- References 700
- About the Author 702
# Table of Contents

## Chapter 10  Ergonomics and Occupational Safety  703
- Ergonomics As a Science  703
- Information Ergonomics in Industrial Control  706
- Planning Control Centers  715
- Technical Personnel Training  727
- Occupational Safety  730
- Bibliography  736
- About the Author  736

## Chapter 11  Project Management Strategies  737
- Standards  737
- Documentation  739
- Instrumentation Projects  753
- Engineering Phases  758
- Site Work  779
- Conclusion  781
- Bibliography  781
- About the Author  781

## Appendix 1  Laboratory Standards  783
- Introduction to Laboratory Standards  783
  - Pressure  789
  - Temperature  807
  - Liquid Level  827
  - Miscellaneous  831
- About the Author  838

## Appendix 2  Basics of Electricity and Electronics  839
- Electrons  839
- Direct Current  839
- Bridge Circuits  841
- Alternating Current  844
- Solid-State Electronics  848

## Appendix 3  Basics of Chemistry  855
- Basic Definitions  855
- Valence  856
- Symbols, Formulas, and Equations  857
- Molecular Formulas and Percentage Composition  858
- Inorganic Chemistry  860
- Organic Chemistry  862

## Index  865
