Thursday, September 24th Training

Introduction to ISA100 Wireless- “The Confident Choice for End Users Everywhere”

Come learn more about ISA100 Wireless!

Greg Hallauer, has over 30 years of experience in the Automation industry with a specific focus on the Oil & Gas industry over the past six years.

His presentation will cover the basics of ISA100 wireless technology, the background for the standard, its strengths, and the flexibility offered when using it. He will also cover different implementation strategies and applications where the technology is being used by end users globally.

5:30pm Sign-In, Socializing, Heavy Appetizers
6:00pm Training Presentation
7:00pm Q&A.

Cost: Free for ISA Members
Free for Students.
$20 for non-members.

*Continuing Education Credits Awarded

Location:
Jacobs Engineering,
5005 SW Meadows Rd. Lake Oswego 97202

President’s Message

It is September once again, which means only one thing. You guessed it great topics, conversation, and food are in store for this year’s event schedule.

We will be kicking off the year with Greg Hallauer from Yokagawa Analytical. His topic is an introduction to ISA-100 Wireless. As the world of automation is changing so is the way communication occurs between instruments. I am sure Greg will bring the information needed for successful implementation of this Standard.

A big thank you to all of our speakers from last year, they did a wonderful job.

Congratulations to the eight new automation professionals who recently joined ISA. You have joined a professional organization that has much to offer in terms of technical knowledge, standards, and networking with your fellow Automation professionals.

Coming up this month:

**Introduction to ISA100 Wireless- “The Confident Choice for End Users Everywhere”**

On Thursday September 24th 5:30pm at Jacobs Engineering

See you at an event soon,

John Scharosch,
President - ISA Portland
Instructor NIETC
Capitol Electric Co.

Do you know a member you would like to recognize (ie. Did a presentation, got a professional license, got published)? Contact the ISA Secretary at contact@isaportlandoregon.org and we will put it in the next newsletter.
Members,

As we head into a new year, please consider your role in setting the direction of the ISA by participating as a member in one of the standards committees. All ISA standards are consensus standards and the more that the base of working Automation and Instrument professionals get involved, the more complete and applicable the standards are. From personal experience I can tell you that you can rise to the level of voting member quickly, on any committee, if you exhibit knowledge and passion, and are willing to put the time in to review and comment on the draft standards.

Please review the list of committees currently active at the link below and if you have subject area knowledge and have passion to make a difference, join and help shape the future of our industry. If you would like to team with other members of the section to develop a "section" review, please see me at the January meeting and I will work with you to develop a plan to implement.
